North America R&D/Engineering

Honda R&D Americas, Inc.

Initially established as Honda Research California in 1975 to conduct market research in the U.S., Honda R&D Americas, Inc. (HRA) has steadily expanded the size and scope of its operations and responsibilities. Today, Honda R&D Americas conducts “complete product creation” in the U.S. to research, design and develop products that meet the needs of our customers. Like Honda R&D Co., Ltd., in Japan, HRA is a company separate from Honda’s North American manufacturing and sales and marketing companies, with the flexibility to pursue its design and development goals. HRA currently operates 13 R&D facilities in North America. Following is a look at the major centers.

Operation	Location	Began
Los Angeles Center	Torrance, California <i>Responsibilities:</i> Automobile and motorcycle market research, concept development and styling design. The Los Angeles Center designed the current Honda Civic sedan, Odyssey, Pilot and Ridgeline. In 2006, Honda R&D completed construction on a new Acura Design Studio, adjacent to its existing Torrance facility, focused solely on the Acura automotive brand. It designed the current Acura TLX, RDX, MDX and NSX supercar. In early 2007, R&D began operations at a new Advanced Design Studio, responsible for the development of future design concepts for Honda and Acura.	January 1975
Ohio Center	Raymond, Ohio <i>Responsibilities:</i> Automobile, motorcycle and powersports research and product development. The Ohio Center is located close to the Performance Manufacturing Center and Marysville and East Liberty auto plants, and responsible for product development including the current Honda Civic Sedan, Pilot, Odyssey and Ridgeline, and the Acura NSX, TLX, RDX and MDX. It is also responsible for all Honda side-by-side production. The Automotive Safety Research Facility at the Ohio Center houses one of the world’s most sophisticated high resolution crashtest barrier blocks, the world’s first pitching crash test simulator, along with other advanced safety research and testing labs.	July 1985
North Carolina Center	Haw River, North Carolina <i>Responsibilities:</i> Power equipment product research, product development and testing. Located adjacent to Honda Power Equipment Mfg., Inc., the 11,000-square-foot facility is focused on power equipment development.	August 1993
Marine Engine Research Facility	Grant-Valkaria, Florida <i>Responsibilities:</i> Development and testing of Honda marine engines. The facility received green-building certification from the U.S. Green Building Council in March 2010.	December 2008

Honda Aircraft Company

Established in 2006, Honda Aircraft Company is responsible for Honda’s overall airframe business including the development, certification, sales, production and product support of the HondaJet.

Operation	Location	Began
	Greensboro, North Carolina	August 2006 <i>Responsibilities:</i> Support of the HondaJet, an advanced, high-performance light jet with technology and design innovations including the patented Over-The-Wing Engine Mount configuration (OTWEM), natural laminar flow wing and nose and composite fuselage.

Honda Engineering North America, Inc.

Honda Engineering North America provides Honda plants with highly competitive production methods and equipment, including maintaining its existing operations to achieve the highest standards, and equipping Honda plants with the latest strategies and world-class production methods.

Operation	Location	Began
	Marysville, Ohio Anna, Ohio Lincoln, Alabama Alliston, Ontario, Canada <i>Responsibilities:</i> This proprietary company designs, develops and manufactures the stamping dies and specialized production equipment required for Honda manufacturing operations in the region. EGA headquarters is located adjacent to the Marysville Auto Plant. Other EGA locations are located near major manufacturing operations in the U.S. and Canada.	May 1985

Honda R&D Innovations, Inc.

Formed in April 2017, the new company will seek transformative collaborations within all areas of Honda’s activities. Honda Innovations will remain located in Mountain View, CA, and will operate globally as it seeks to partner with innovators ranging from startup and global brands to design and development communities.

Operation	Location	Began
	Mountain View, California <i>Responsibilities:</i> Focus areas include Connected Vehicle/Internet of Things (IoT) services, Human Machine Interface, Machine Intelligence/Robotics, Connected Services, Personal Mobility, Sharing Economy, and Industrial Innovation.	April 2017
